* Model 75 Only

For Network Managers & Technicians

Monitor Network Health

Manage Moves & Changes

Identify Cable & Network Problems

Optimize Performance

PingerPro™

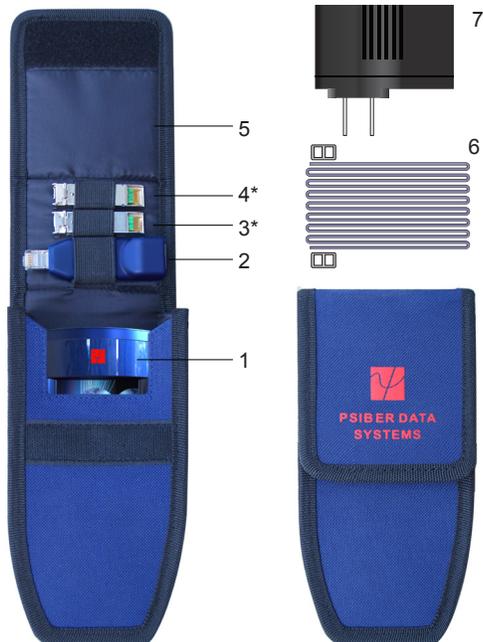

WHY PingerPro

The PingerPro's extensive features make it even easier for managers and technicians to meet the growing challenges of cable and network management.

The PingerPro brings a new level of cable testing with: fault location, Gigabit Ethernet capability, advanced IPv6 support, and Logical Link Data Protocol (LLDP/CDP) to a powerful feature set that you use every day. As a result, the PingerPro is the complete high-performance first-response-tool, designed to solve your most frequent network problems.
